

Orbix (ORX) Token – Whitepaper

Introduction

Orbix (ORX) is a decentralized utility token built on the **Polygon blockchain**, aiming to provide fast, low-cost transactions and long-term profitability for its holders. Orbix incorporates staking rewards, deflationary mechanisms, and a fixed transaction fee to drive value back into the ecosystem and reward committed users.

Vision

To become a leading decentralized asset for everyday transactions and DeFi integration, built on a scalable and user-friendly infrastructure.

Tokenomics

- **Token Name:** Orbix
- **Ticker Symbol:** ORX
- **Total Supply:** 900,000,000 ORX
- **Decimals:** 18
- **Network:** Polygon (MATIC)
- **Contract Address:** 0xF4EDC72777e2AD20a02caA72b7BF51B7281BdAdE
- **Transaction Fee:** 2% on every transfer
- **Fee Recipient Wallet:** 0x538f5aE9Ce9a68d3D49536cEDE650D0210C73DBf

This transaction fee helps reduce market volatility, encourages holding, and funds long-term development.

Key Features

Upgradeable Contract

Built using OpenZeppelin's proxy architecture, the ORX token is upgradeable — allowing for the addition of new functionalities over time without changing the token address.

Fixed Fee Structure

Every transaction incurs a **2% fee**, automatically sent to the Orbix treasury wallet. This system encourages holding and funds community incentives and growth.

Staking Rewards

Users can stake ORX tokens in fixed-term pools and earn stable returns, contributing to a strong, loyal ecosystem.

Multi-Wallet Compatibility

The Orbix website supports MetaMask, WalletConnect, Trust Wallet, and other major wallets for easy access and management of ORX tokens.

Roadmap

☒ **Phase 1 – Token Development**

- Develop and deploy the upgradeable ORX token on the Polygon network
- Enable transaction fees, minting, and staking capabilities

Phase 2 – Infrastructure

- Launch professional project website
- Integrate full wallet support (MetaMask, WalletConnect, etc.)
- Add staking interface and dashboard

Phase 3 – Exchange Listings

- Submit token for listing on **Uniswap**, **QuickSwap**, and **CoinGecko**
- Enable price tracking and liquidity pools

Phase 4 – Expansion

- Launch targeted marketing campaigns
 - Partner with influencers and blockchain projects
 - Submit for **CoinMarketCap** listing
 - Explore centralized exchange (CEX) listings
-

Use Cases

- **Staking and passive income**
 - **Low-cost peer-to-peer transfers**
 - **DeFi integration**
 - **Loyalty rewards in future apps/platforms**
-

Conclusion

Orbix (ORX) is built with a strong vision of being a robust and dynamic token for the DeFi world. With a focus on scalability, staking, and real-world utility, Orbix aims to empower its holders through transparent mechanics and long-term value.
